Education

University of California Los Angeles — Los Angeles, CA

Bachelor of Science in Computer Science — *Expected June 2028*

- Relevant Coursework: Object-oriented Software Development, Computer Architecture, Digital Systems

Experience

Student Web Developer — Jul. 2026 – Present

UCLA Life Science Computing — *Los Angeles, CA*

- Maintain and improve 10+ WordPress sites for the Division of Life Sciences, resolving 50+ support tickets covering accessibility, mobile responsiveness, and content updates for faculty and staff
- Remediate WCAG 2.1 AA issues (heading order, semantic markup, accordion and block fixes), raising accessibility scores from 70% to 95%+ as measured by an axe-core-based scanner
- Update the UCLA WordPress theme, plugin, and ucla-tec-template code (PHP/CSS) through Git/GitHub to meet accessibility guidelines

Information Technology Support Specialist — Oct. 2026 – Present

UCLA International Institute — *Los Angeles, CA*

- Track and maintain department equipment inventory across Webtools and Excel
- Provide employees with technical support, troubleshooting issues, answering tech-related inquiries, and managing equipment loans

Intern — Jun. 2025 – Aug. 2025

Republic Services — *Alhambra, CA*

- Assisted in setting up 20+ customer accounts in Salesforce and Infopro, providing live Mandarin translation for Mandarin-speaking residents
- Logged on-site waste assessment measurements and driver-submitted overflow data into operations records

Projects

Chromatin State Prediction | *Python, TensorFlow* — Jan. 2026

- Built and trained a 4-layer 1D CNN to classify 200bp DNA sequences into chromatin states in a 4-person hackathon team (80/20 train/validation split of 286K+ sequences)
- Used kernels from 30 down to 3 (64 to 512 filters) to capture broad-to-specific motifs, with dilated convolutions, global average pooling, dropout, AdamW, and label smoothing
- Doubled the training data with reverse-complement augmentation, reaching 19.5% peak validation accuracy

Lifetime Engineering Applications Project | *Aveva PRO/II* — Sep. 2025 – Dec. 2025

- Developed a process flow diagram (PFD) in Aveva PRO/II for industrial-scale hand sanitizer production
- Optimized flow rates, operating pressures, and temperatures to maximize throughput while meeting formulation constraints

Drip N' Sip | *Arduino, CAD, Circuit Design* — Oct. 2024 – Mar. 2025

- Co-engineered an automated coffee machine prototype in a 4-person team using Arduino, laser-cut parts, CAD modeling, and custom circuits
- Won 1st place for a technical proposal and pitch on an Arduino-monitored thermal feedback loop

Touch Grass | *Figma, UI/UX Design, Prototyping* — Feb. 2026

- Designed the Figma prototype for a gamified fitness iOS app (7 screens: onboarding, permissions, home base, dashboard, collection, watering, achievements) in a 3-person team

Technical Skills

Languages: Python, C++, JavaScript, HTML/CSS
Libraries & Frameworks: TensorFlow, pandas, NumPy, Matplotlib, React, Node.js
Tools: Git, VS Code, Excel, WordPress, Figma, Aveva PRO/II, Arduino, CAD
Spoken Languages: English, Mandarin
